

POWER SPIN-GRIT BRUSHES

These brush are used for removing soft and light scale deposits in straight, ferrous and non-ferrous internally enhanced tubes. The small diameter end of each of each brush cleans into the grooves of the tube's rifling with the ends of the brush filaments. The large diameter end of the brush cleans the lands of the tube's rifling, as well as any prime surface, with the sides of the brush filaments. Order brush to correspond to tube I.D.

Tube I.D.		Power Spin-Grit Brushes
INCH	MM	
1/2	12.7	BPSGB-050
5/8	15.9	BPSGB-062
3/4	19.1	BPSGB-075
1	25.4	BPSGB-100

COLOR CODED SHOOT THRU SCRUBBERS

In most cases Hard Tube Scrubbers are recommended for removing light to medium deposits in condensers order.

Tube Scrubbers by Model & Color

Tube I.D.		Scrubber O.D. (INCH)	Model	Color	Type
INCH	MM				
0.495-0.541	12.57-13.74	0.560	BTS-560-S	Yellow	Soft
0.527-0.555	13.39-14.10	0.560	BTS-560	Yellow	Hard
0.570-0.620	14.50-15.75	0.630	BTS-630-S	Brown	Soft

7/8	22.2	BFHT-087
1	25.4	BFHT-100

FLEX-HOSE ABRASIVE TOOLS are light pressure, soft application honing devices for straight tubes. They consist of 180 grit silicon carbide abrasive globules (stones) bonded to high density nylon filaments. They are flexible, self-compensating for wear. Their unbreakable stones are formulated to provide for a long lasting, consistent finish. Order tool to correspond to tube I.D.

Note : Flex-Hone Abrasive Tools are normally used with a water flush for maximum life.

Flex-Hose Abrasive Tools
